

Are You Interested in Going to Graduate School?

The Tulane/Xavier Environmental Biology Research Program may be for you!

*Get a New Perspective on
Environmental Biology and Research*

Program Description:

The Undergraduate Research Mentoring Program for **Enhancing Diversity in Environmental Biology** welcomes applications for research fellowships. The goal of this project is to recruit and mentor minority undergraduate students to prepare them to gain admission, to successfully matriculate and to complete graduate programs in environmental biology. This program is funded by a grant to Tulane and Xavier by the National Science Foundation (NSF).

Program Components:

- Generous Stipend: Summer and Academic Year
- Mentored Summer and Academic Year Research
- GRE Preparation and Testing
- Career Exploration

Who is Eligible?

- First-year students and 1st semester sophomore level students majoring in the STEM disciplines (STEM = Science, Technology, Engineering, or Math)
- Cumulative GPA of 2.8 or higher
- U. S. citizenship
- Please note that pre-med students are **INELIGIBLE!**

Program Dates:

Students accepted into the program will begin their summer research training with an orientation on Friday, June 29th.

- **The training is scheduled to last five weeks: July 1nd, 2013 to July 29th, 2013**
- **Application Deadline: March 8th, 2013**
- **Application Material Available at:**
